LADWP Crews Working To Restore Power Outages During Heavy Winds

LOS ANGELES —The Los Angeles Department of Water and Power (LADWP) reports approximately 16,300 of LADWP's 1.4 million electric customers are experiencing power service interruptions as heavy winds have caused 164 outages in several neighborhoods across the city. The wind storms typically result in power outages as dried palm fronds, tree branches, downed trees and other debris fall and make contact with power lines. LADWP crews are working as diligently and as safely as possible under these heavy wind conditions to restore power to customers affected.

The following communities have the most number of customers impacted:

- Exposition Park 1427 customers affected
- East Hollywood 2123
- Mid-Wilshire 642
- Baldwin Hills/Crenshaw 1916
- Northridge 3542
- Canoga Park 401
- North Hollywood 497
- Sylmar 817
- Panorama City 751
- Faircrest Heights 1370

The public and members of the media are encouraged to check the Department's [news site](#) and [Twitter page](#) for updates. The next outage update will be posted at approximately 11:00 p.m.
